Motivated and detail-oriented fresher seeking a Full Stack Developer or related role where I can apply my skills in Python, Django, React, and JavaScript to build scalable web applications. Eager to contribute to real-world projects and grow within a dynamic development team.

TECHNICAL SKILLS

Languages:	Python, JavaScript
Frontend:	HTML, CSS, React
Backend:	Django
Database:	SQL, SQLite
Tools & AI:	VS Code, ChatGPT, Cursor AI, GitHub Copilot

EDUCATION

Bachelor of Engineering — Electrical and Electronics Engineering	2020 – 2024
Prince Shri Venkateshwara Padmavathy Engineering College, Chennai	CGPA: 8.65

CERTIFICATION

Python Full Stack Developer (JS & React Based) — FITA Academy, Classroom Training

PROJECTS

Bus Ticket Booking System

[GitHub](#) | [Live Demo](#)

Tech: Python, Django, React, SQLite, HTML, CSS, JavaScript

- Built a full-stack web app enabling users to search buses, check seat availability, and book tickets online.
- Implemented secure online payment flow and booking management using Django REST backend and React frontend.
- Designed relational database schema in SQLite for routes, schedules, and seat management.

Machine Monitoring Dashboard

[GitHub](#) | [Live Demo](#)

Tech: HTML, CSS, JavaScript, React

- Developed a responsive dashboard to monitor machine performance metrics and generate analytical reports.
- Provided actionable insights through interactive data visualizations using React components.

Portfolio Website

[GitHub](#) | [Live Demo](#)

Tech: React, CSS, Framer Motion

- Designed a modern, responsive portfolio with dark mode, smooth animations using Framer Motion.
- Optimized performance and layout for recruiter-friendly presentation.

College Website

[GitHub](#) | [Live Demo](#)

Tech: HTML, CSS, JavaScript, Python, Django, Node.js, SQL

- Built a full-featured college website with course listings, faculty profiles, and event announcements.
- Integrated backend with Django and SQL for dynamic content management.
